DisposeRx[®]

Solving the problem of drug disposal

DisposeRx is a simple, convenient and effective at-home medication disposal solution designed to reduce the risks associated with leftover medications, such as accidental poisonings, overdoses and addictions.

DisposeRx packets contain components that are eco-friendly and listed on the FDA inactive ingredients list for approved medications. Simply add water to a prescription vial of unused medications, pour in the DisposeRx powder and shake for 30 seconds. A thick gel will form making the medication unusable so you can safely throw it away in your household trash.

Simple. Convenient. Effective.

Instructions for Disposal

1. Add water until vial is 2/3 full.

2. Empty DisposeRx powder into vial, replace cap and shake for 30 seconds.

3. Safely discard in trash.

Remember

- Don't take medications longer than needed.
- Don't share your prescriptions with others.
- Don't take someone else's medications.
- Don't take more than the prescribed amounts.
- Don't leave your medications unsecured.
