

DisposeRx is proud to partner with states across the country to provide a simple medication disposal solution and critical education to their citizens. Learn more below about how DisposeRx is working with state boards of pharmacy, health and human services departments, state Medicaid programs and others.

ALASKA PROGRAM:

Packet distribution and Naloxone/ Narcan bundling

The Board of Pharmacy purchases DisposeRx at-home medication disposal packets to distribute to pharmacists and providers in rural and remote areas of Alaska that do not have medication take-back kiosks. Further, Project HOPE—a program under Alaska's Department Health and Social Services, purchases DisposeRx to bundle with Narcan to distribute throughout community organizations in Alaska.

IOWA PROGRAM:

Pharmacy reimbursement

Using State Opioid Response grant funds, the Iowa Board of Pharmacy and the Iowa Department of Human Services [reimburse Iowa pharmacies \\$7.50](#) to provide education to each resident on the risks associated with opioid medications, as well as dispense an at-home medication disposal product, such as DisposeRx. Residents are allowed up to two medication disposal packets each month.

WEST VIRGINIA PROGRAM:

Medication safety pilot

In Spring 2022, West Virginia Drug Intervention Institute launched a pharmacy reimbursement pilot with independent and regional pharmacies. Using State Opioid Response grant funding and other sources, WV DII provides pharmacists with education and access to an Opioid Use Disorder screening tool, as well as Naloxone and DisposeRx medication disposal packets.
