**DisposeRx Executives Join President Trump at the White House  
As Historic Opioid Legislation is Signed Into Law**

*Industry Leader in At-Home Drug Disposal Donating Packets  
To Destroy 10 Million Opioid Pills in American Homes*

*CEO Issues Call to Action for All Americans to  
Clean Out Their Medicine Cabinets This Week*

Southern Pines, NC – October 24, 2018 -- DisposeRx Inc. (<http://www.disposeRx.com>) celebrated a turning point in the opioid crisis today by joining President Trump at the White House as he signed into law a comprehensive legislative package designed to stem the nation's opioid crisis. Joining President Trump, White House officials, and members of Congress, were DisposeRx Chief Executive Officer, Dr. John Holaday, DisposeRx President, William Simpson, and representatives from national retailers, advocacy groups and associations who have worked together to bring critical new programs, funding, and new technologies to bear on our nation's opioid epidemic.

As part of the White House signing ceremony today, DisposeRx executives announced that they are donating a quantity of their DisposeRx at-home drug disposal packets sufficient to destroy over 10 million opioid pills.

DisposeRx President William Simpson commented on the initiative, "We are committed to stop the opioid epidemic by eradicating the misuse of unused medications. We will continue to work alongside government and industry leaders, including HR-6 co-sponsor Congressman Richard Hudson, and will join our pharmacy partners, such as Walmart, Rite Aid and Kroger, in donating our abuse-deterrent drug disposal packets so that 10 million opioid pills can be removed from home medicine cabinets, the source of over 70% of new addictions in this country."

DisposeRx CEO Dr. John Holaday issued a call to action for all Americans, "With the passage and signing of this new legislation, the federal government has codified the value of site-of-use drug disposal to help reverse our nation's prescription medication abuse crisis. Today, we begin the work to change the course of this epidemic by reshaping the culture and habits of prescription medication disposal. Leftover medications are potentially fatal time bombs that must be

destroyed the moment they are no longer being used. **We urge all Americans to use this week to clean out their medicine cabinets and put an end to needless overdoses and deaths from drug misuse, abuse and diversion.**”

Congressman Richard Hudson, member of the House Energy and Commerce Sub-Committee on Healthcare and champion of the bipartisan endeavor to pass this legislation, discussed the federal government’s efforts to end the opioid crisis on a podcast released earlier this week on the series, “Opioids: Hidden Dangers, New Hope” that can be accessed at [Opioids-HiddenDangers-NewHope.com](http://Opioids-HiddenDangers-NewHope.com) and on iTunes at <https://itunes.apple.com/us/podcast/opioids-hidden-dangers-new-hope/id1435958426?mt=2>

### **About DisposeRx Packets**

DisposeRx packets contain a blend of patented and proprietary solidifying materials that provide a safe solution for the disposal of unused or expired medications. When water and the DisposeRx powder are added to drugs in the prescription vial and shaken, the drugs are dissolved and then chemically and physically sequestered in a viscous polymer gel made from materials that are FDA approved for oral medications. For more information and to order DisposeRx packets please visit our website at: <https://disposerx.com/>

### **About DisposeRx, Inc.**

DisposeRx, Inc. is a drug disposal company that provides a solution to eradicate the misuse of unused medications. With offices in North Carolina, the Company is spearheading programs to educate communities about practical, convenient, inexpensive and safe medication disposal solutions, preventing drug addictions, overdoses and deaths. We distribute our drug disposal product through pharmacies, hospitals, hospices, community groups, law enforcement agencies, retailers and wholesalers nationwide. DisposeRx treatment both chemically and physically sequesters medications in a viscous gel, which eliminates the opportunity for drug diversion and prevents the pollution of water supplies. DisposeRx’s simple-to-use disposal solution enables users to secure a healthier home and facilitates the easy disposal of unwanted medications into household trash.
